Thatta Kedona - The Toy Village of Pakistan, 183 mins, 2005, Pakistan

- Thatta Kedona is a remarkable village in rural Pakistan. 36 volunteers from Western countries have visited and coached the village people in a help to self help project since

1991. Dolls and tin toys reflecting regional cultures of Pakistan are products which generate cash income for the farming families through the local cooperative-like NGO. Hence the playfulness of a "toy village" is on both sides: for the villagers by manufacturing hand-craft toys for cash in a not-yet industrialized region avoiding rural exodus to the big cities (poverty slums that are generated in cities by migration). -- And on the other side one can notice the joy of Western volunteers being confronted at work by their own history framework but in present time and with a very foreign and sometimes strange context.
